MUZAFFAR ORZIBOYEV

FULL STACK DEVELOPER

PROFIL

My name is Muzaffar as my parents and sisters like it. I have been very interested in mathematics and physics since I was 7 years old. At the age of 12, programming entered my life. And I have been organizing the principles of programming since I was 12 years old. I attended IT PARK for almost 2 years. And I studied for 1 year at Salvation Education and further increased my experience.

WORK EXPERIENCE

CREATE A TELEGRAM BOT
Name of the Project

I have tested and strengthened my knowledge of node js and php in this project. In this project, I made a bot that uploads videos from tiktok to instagram.

ARTIFICIAL INTELLIGENCE
Name of the Project

In my artificial intelligence project, I made a great voice-controlled website using alan website, starting with react principles. Sources in this https://alan.app

BUILD EXTENSIONS
Name of the Project

building extensions has taught me to interact with many programming languages. And I had great experiences. In this project I created MOMENTUM google extension.
